Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 December 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species I, as disclosed in Figures 1-9
- Species II, as disclosed in Figures 10, 11, 14 and 15
- Species III, as disclosed in Figures 12-13
- Species IV, as disclosed in Figures 16-17

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- Claims 22-29 and 35-41 correspond to Species I
- Claims 22-24, 29-31, 33 and 40 correspond to Species II
- Claims 22-24, 29, 30, 32, and 33 correspond to Species III
- Claims 22-24, 29, 30, 33, and 34 correspond to Species IV

The following claim(s) are generic: 22-24 and 29

The following claim(s) are linking: 30, 33, and 40

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Claims 22-29 and 35-41 disclose a single wobble plate having a swivel arm supported on a swivel support that engages a radial groove via a rounded swivel head within a swivel section of the housing. It further discloses a single bearing pin comprised of self-lubricating plastic material, wherein the bearing pin has a metal insert and the single wobble plate being an integrally formed gear wheel that is formed by stamping a metal blank. The aforementioned special technical features are not included in claims 30-34.

Claims 22-24, 29-31, 33 and 40 discloses a second eccentric on the wobble plate having a bearing opening on the guide arm, where the first and second eccentrics are arranged on opposite sides of the worm gear and is driven by the worm gear. The aforementioned special technical features are not included in claims 25- 28, 32, 34-39 and 41.

Claims 2-24, 29, 30, 32, and 33 discloses a second eccentric on the wobble plate having a bearing opening on the guide arm, where the first and second eccentrics are staggered in an axial direction of the worm gear on one side of the worm gear and is driven by the worm gear. The aforementioned special technical features are not included in claims 25-28, 31, 34-41.

Claims 22-24, 29, 30, 33, and 34 disclose a second wobble plate and a second driven wheel driven by the second wobble plate. The aforementioned special technical features are not included in claims 25-28, 31, 32, and 35-41.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
